SUMMARY

Fractional Head of Product & Growth with 14 years and 105+ projects shipped across a career spanning global brands. MIT-certified in AI/ML. I design product systems, build with AI tools including vibe coding stacks, and architect automation workflows that give early-stage startups the operational leverage of a larger team. Currently building Gamana, an AI-native digital travel concierge, from zero to MVP launch. Available for AI consulting, product design, agentic AI workflow builds, and fractional product leadership engagements.

SKILLS

Product & Growth: Product strategy, GTM, JTBD framework, AARRR funnel optimization, ICE scoring, growth loops, North Star metrics, conversion-retention optimization, design sprints, roadmap planning, stakeholder management

AI & Automation: AI consulting, AI workflow design, GPT-4o, Claude API, prompt engineering, LLM product integration, agentic AI workflows, AI agent orchestration, Make, Zapier, n8n, API integrations

Vibe Coding & Prototyping: Cursor, Bolt, Lovable, v0, Framer, Replit — concept to deployed prototype in days without traditional dev cycles

UX & Design Systems: Figma, Framer, UX design, design systems architecture, interaction design, user research, wireframing, usability testing, mobile-first design, cross-platform UX

PM Tools: Notion, ClickUp, Jira, Azure DevOps, Asana, Miro, Slack

EXPERIENCE

Gamana | Bengaluru, India

Head of Product & Growth Mar 2025 – Present

- Founded and launched MVP of an AI-native digital travel concierge — owning end-to-end product strategy, UX design, GTM execution, and growth architecture from zero to market
- Architecting agentic AI workflows using Claude API and GPT-4o for personalized itinerary generation, real-time experience recommendations, and automated post-booking user engagement
- Shipping core product using vibe coding stack — Cursor, Framer, and Bolt — compressing multi-week development cycles into days through AI-assisted prototyping and rapid iteration
- Designing and automating internal operations pipelines using Make and n8n, eliminating manual overhead from day one and enabling lean team execution
- Building growth loops across referral, content, and partnership channels with activation rate and 30-day retention as primary North Star metrics
- Designed and built OLL Research — a complete organizational learning and research platform — handling end-to-end product design, architecture, and delivery as a solo builder using AI-assisted development

Designient Technologies Pvt. Ltd. | Hyderabad, India

Director Aug 2023 – Feb 2025

- Led product strategy and design execution across 40+ SaaS and mobile app engagements for global clients including Lenovo — achieving 30% uplift in client satisfaction and 15% reduction in project delivery costs
- Integrated AI-assisted design tools and GPT-4-powered workflow automation into delivery processes from mid-2023 onward, cutting prototype-to-handoff cycles by 40%
- Automated client reporting and user research synthesis using LLM-integrated pipelines, eliminating approximately 8 hours per week of manual work across the team
- Built and scaled a cross-functional remote team; established reusable design systems that reduced rework and accelerated delivery across recurring client engagements

Softobiz Technologies Pvt. Ltd. | Hyderabad, India

UX Lead Aug 2022 – Aug 2023

- Led UX research and product design for SaaS platforms including EasyWebinar and Cashel Family — identified critical drop-off points through stakeholder interviews and user research, redesigned core flows to directly address friction and improve user satisfaction

- Owned full product design lifecycle from discovery through usability testing; drove cross-functional alignment between product, engineering, and business stakeholders
- Won Leadership Excellence Award, Jul 2023

CredApp Software Pvt. Ltd. | Gujarat, India

Lead UX Designer Jan 2022 – May 2022

- Delivered user-centered design improvements for a fintech product; established remote collaboration workflows that improved team velocity and design quality

Designient School | Bengaluru, India

UX Lead & Mentor Nov 2018 – Jan 2022

- Mentored 500+ aspiring product designers across cohorts; 350+ secured industry placements at companies including Mashreq Bank (Dubai), TCS, and Infosys
- Built and delivered curriculum bridging UX fundamentals with real-world product thinking, business objectives, and cross-functional collaboration skills

Salsoft Technologies | Bengaluru, India

Senior Product Designer Apr 2014 – Sep 2018

- Led product design for international clients across fintech, edtech, and e-commerce — consistent on-time delivery across 4 years of enterprise contract work
- Built UX process from scratch for multiple engagements: discovery, wireframes, prototypes, usability testing, and developer handoff

Earlier: IQ Channels, Prototypal Records — design and customer-centric roles (Sep 2010 – Mar 2014)

EDUCATION

B.Tech — Computer Science & Engineering

Indian Institute of Science and Technology, Hyderabad | 2006 – 2010

CERTIFICATIONS

-
- AI & Machine Learning — MIT Professional Education (Completed)
 - Generative AI Bootcamp (3-Day) — Outskill, May 2026
 - Design Thinking: Insights to Viability — Stanford University, Mar 2020
 - Diploma in UX Design — BrainStation, Feb 2022
 - Adobe Certified Associate — Adobe, Aug 2017

RECOGNITION & COMMUNITY

-
- Keynote Speaker — National UX Summit, May 2022
 - ADPList Mentor — Aug 2024 – present (500+ designers mentored globally)
 - Leadership Excellence Award — Softobiz Technologies, Jul 2023
